Aya Nagar	28.471	77.110	IMD	0	19.4	86.2	92	93.4

Table S1. A list of ground measurement stations and their longitudinal and latitudinal coordinates. The operator column indicates the operator of the station, either Delhi Pollution Control Committee (DPCC), Central Pollution Control Board (CPCB) or India Meteorological Department (IMD). The list is sorted from the northernmost station to the southernmost. The "N%20xx" values indicate the data coverage percentage for the corresponding year. The data coverage percentage was calculated based on the original 30 min measurement data.

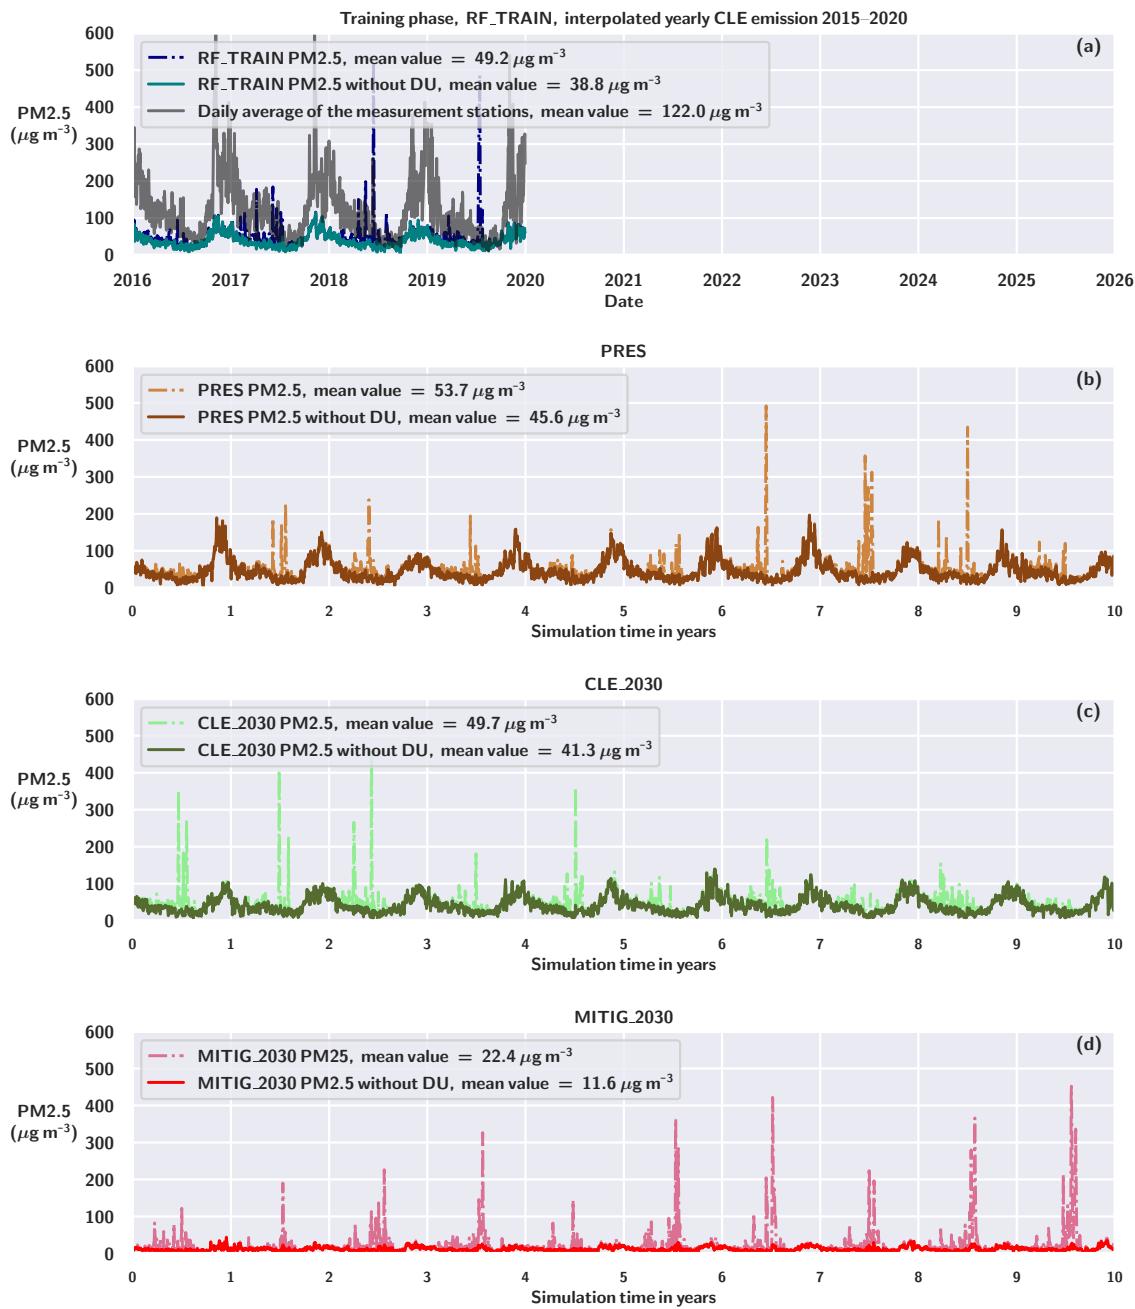

Figure S2. PM2.5 concentrations from ECHAM-HAMMOZ simulations for New Delhi with and without mineral dust component for (a) RF_TRAIN (b) PRES (c) CLE_2030 and (d) MITIG_2030. The average concentrations of the daily values for measurement stations are shown in (a).

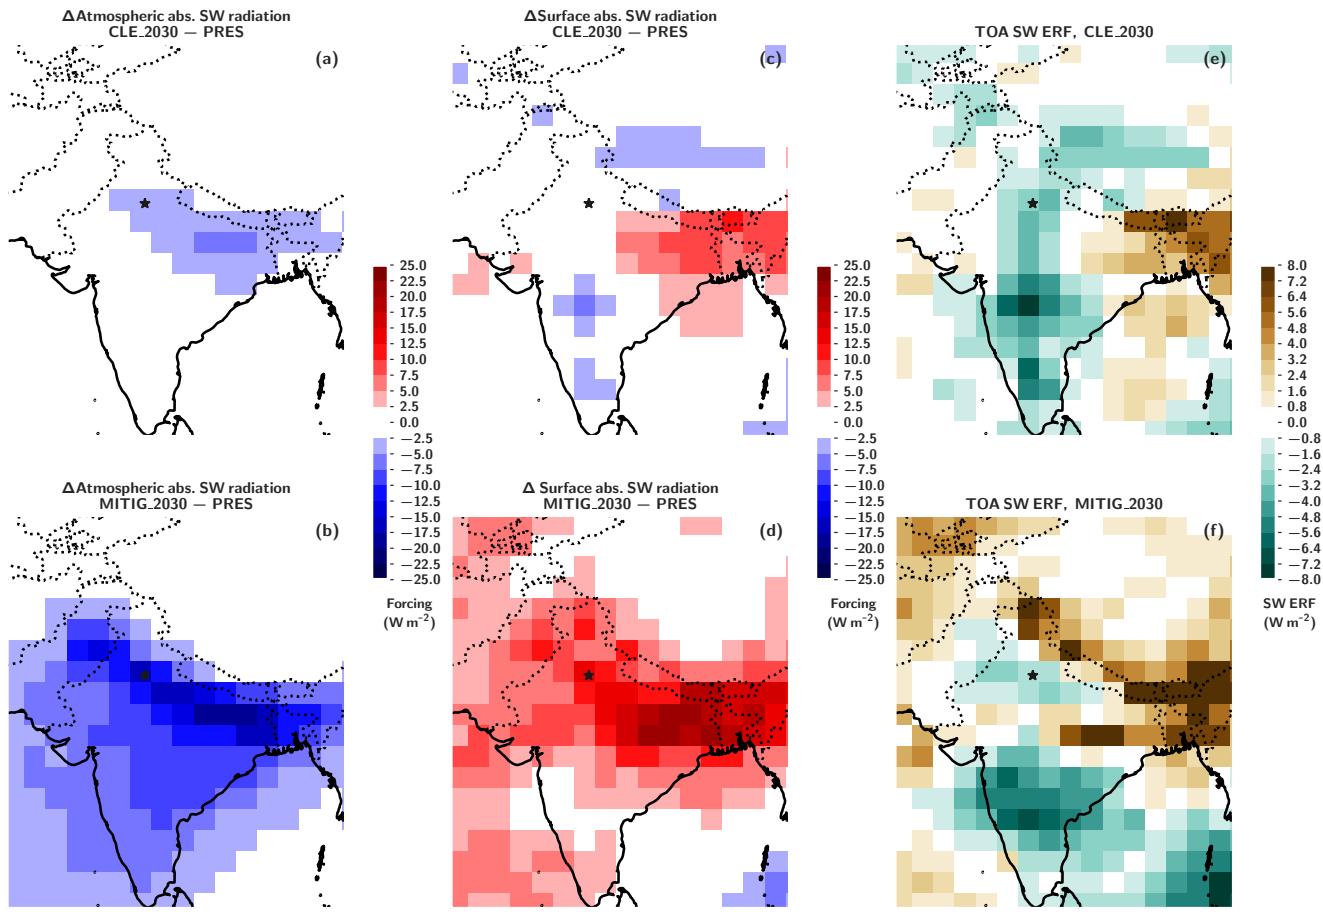

Figure S3. (a) Changes in atmospheric SW radiation absorption, CLE_2030 (b) Changes in atmospheric SW radiation absorption, MITIG_2030 (c) Changes in surface SW radiation absorption, CLE_2030 (d) Changes in surface SW radiation absorption, MITIG_2030 (e) Top-of-atmosphere SW ERF, CLE_2030 (f) Top-of-atmosphere SW ERF, MITIG_2030
