

Response to technical corrections for “**Transport pathways of carbon monoxide from Indonesian fire pollution to a subtropical high-altitude mountain site in western North Pacific**” by Saginela RavindraBabu et al.

Dear Editor,  
Jayanarayanan Kuttippurath,

We are submitting our technically corrected revised article titled “**Transport pathways of carbon monoxide from Indonesian fire pollution to a subtropical high-altitude mountain site in western North Pacific**”. The authors wish to thank the Editor for taking care of our manuscript.

Please noted that we have made one relevant change in the final revised manuscript. We have included **Sup. Figure 4** as **Figure 10** in the final revised manuscript.

#### **Response to technical corrections**

1. Coloured or marked text in \*.pdf manuscript file is not allowed. Please provide a clean version of \*.pdf manuscript file (with black text) with the next revision.

**Reply:** We provided a clean version of the manuscript with black text in the revised version.

2. For the next revision, please check if your figures containing photos require a copyright statement/image credit and add it to the figures (or captions) ([https://publications.copernicus.org/for\\_authors/manuscript\\_preparation.html#figurestables](https://publications.copernicus.org/for_authors/manuscript_preparation.html#figurestables) -> Reproduction and reuse of figures and tables). If these figures were entirely created by the authors, there is no need to add a copyright statement or credit. In that case it is important that you confirm this explicitly by email.

**Reply:** Yes, the figures in the manuscript (photos) were entirely created by the authors themselves. It is noted that one of the corresponding authors (Neng-Huei Lin) is a PI (Principal investigator) for the Lulin Atmospheric Background Station (LABS) project and all the co-authors are team members of the LABS project. As a part of the project, we have taken these photos by ourselves.

3. With the next revision, please re-number the figures of the manuscript consecutively. It seems that Figure 7 is missing from the manuscript.

**Reply:** We are sorry for the mistake. We have corrected and renumbered the figures in the revised manuscript.

**We once again thank the Reviewers and Editor for going through the manuscript carefully and providing constructive comments/suggestions which made us improve the manuscript content significantly.**
